

WC LAGARES IN product patented

PIONEERING INNOVATION

Innovation, sustainability and technology in a new Lagares product.

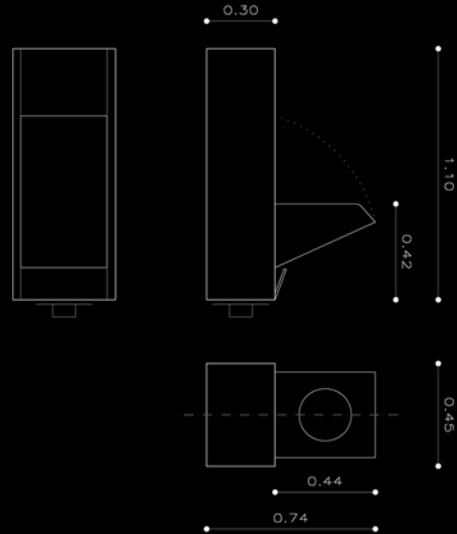

A toilet which includes three basic elements in its composition: Maximum hygiene, minimum water consumption level and be embeddable within any space.

It is produced in a solid surface material, which can be covered with any other material such as stainless steel, wood,... It can be installed on any wall space or within a cabinet, built in or not.

A hygienic and simple operation for opening and closing the toilet is achieved via a touch sensor. Once the toilet is closed, an internal mechanism cleans the bowl using a very low water consumption at low pressure.

Technical features:

- Touch sensor for the opening and closing of the toilet
- Folding system and automatic clean-up after 1 minute without use
- Opening in 4.5 seconds. Closing in 4.5 seconds
- Low water consumption. 2.8 liters per flush
- Electrical functioning with low consumption (24v). Auxiliary Power System with batteries in case of a power failure
- Safety system in the closing operation
- Vertical connection to the drain output

HOME MADE MANUFACTURING. SPECIAL PRODUCTS UNDER DEMAND, TO BE CONSULTED.
