Technical Features :

NET SOLIDS shower base is made of CORIAN, a solid surface material which adds to its formal beauty some important features :

- the use surface is at the same level of the floor, being thus accessible for wheelchair users.
- The surface is non-sliding and smooth which facilitates hygiene.
- Its assembling simplicity and the large hatch surface makes installation easy as well as maintenance of the siphon and the stainless steel groove.
- Shockproof : this product is breakproof and stands bumps, chipping cracks and abrasion produced by daily use.
- Heat Resistant : it is a heat resistant material, approved as Class 1 flammability according to ASTM E-84 norm for all uses.
- Hygienic : this non-porous material is hygienical since it prevents fungi, mould and germs from setting on it. This inert material does not produce emissions at normal temperatures, which makes it a non-toxic, hypoallergenic material.
- Cleaning : common cleaning products make daily cleaning simple and economical.
